SMITH-CORONA®

Coronamatic™ 2200

electric portable typewriter

Now—the professional printed look... for homework, schoolwork and letters.

Icelandic White with Aegean Blue

The ribbon changing chore ends here. Now, with a touch, you remove the used cartridge and tuck in a new one. **CARBON FILM** for the print-like quality of an office machine. **CORRECTION TAPE** fixes errors without erasing. **FABRIC RIBBONS** for routine work. **COLOR CARTRIDGES** for impact, emphasis and beauty . . . you choose and change cartridges from fabric to film, or color to color as often as you like. Fingers never touch the ribbon. **CORONAMATIC CARTRIDGE PORTABLES** are superior in construction, features, styling, convenience and in the print-like work they produce. With the quick-change cartridges, keyboard controls, repeating key actions and dozens of other features, **CORONAMATIC** portables are incomparable.

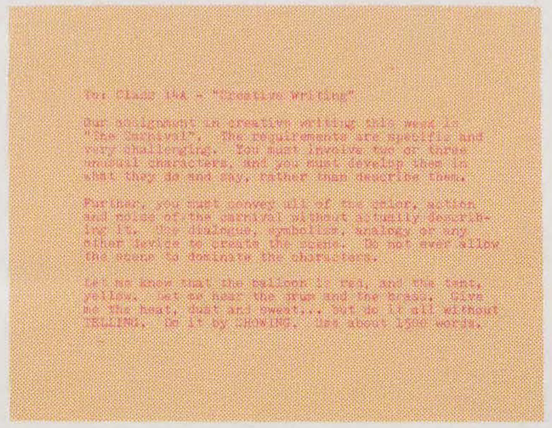
DEAR FAMILY...

I'm writing this letter in color because that's what it is all about up here in the mountains.

The campus is not at all like the city, especially now, in the Spring. Everything is brightening up, including me. Six subjects this term. That gives me a pretty full day, but nights are quite dull.

There is one interesting project I'm getting into, and I hope it doesn't interfere with the family vacation plans. This summer, a lot of us are going to work on the local farms for two weeks. Kids who did it last year say it is just great. The pay is like nothing at all, but I can get a half credit.

Maybe I'll become a pharmer instead of a pharmacist.

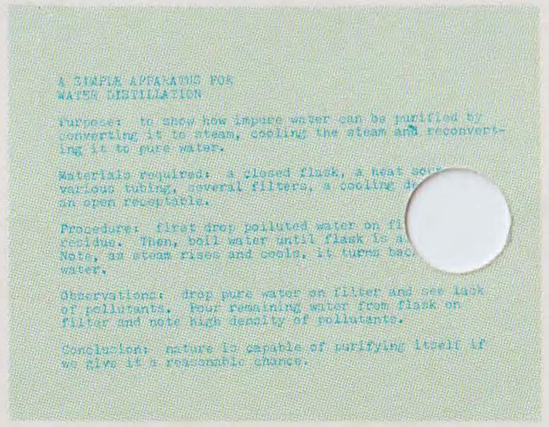


To: Class 14A - "Creative Writing"

Our assignment in creative writing this week is "The Ancient". The requirements are specific and very challenging. You must involve two or three original characters, and you must develop them in what they do and say, rather than describe them.

Further, you must convey all of the color, action and noise of the carnival without actually describing it. No, not even shadows, symbolism, analogy or any other device to create the image. Do not ever allow the scene to dominate the characters.

Let us know that the balloon is red, and the tent, yellow. Let us hear the drum and the brass. Give us the heat, dust and sweat... but do it all without SELLING. Do it by SHOWING. Use about 1500 words.



A SIMPLE APPARATUS FOR WATER DISTILLATION

Purpose: to show how impure water can be purified by converting it to steam, cooling the steam and reconverting it to pure water.

Materials required: a closed flask, a heat source, various tubing, several filters, a cooling [illegible] an open receptacle.

Procedure: first drop polluted water on filter [illegible] residue. Then, boil water until flask is a[illegible] Note, as steam rises and cools, it turns back [illegible] water.

Observation: drop pure water on filter and see [illegible] of pollutants. Now remaining water from flask on filter and note high density of pollutants.

Conclusion: nature is capable of purifying itself if we give it a reasonable chance.

WITH THE CORONAMATIC CARTRIDGE RIBBON SYSTEM

This is the difference!

SMITH-CORONA®

electric typewriters with wide carriage, office size keyboard and cartridge ribbon system.

CORONAMATIC®2200

Every buyer of an electric typewriter should demand printing excellence as a prerequisite — along with dependable performance, durability, features and styling.

The appearance of what you write represents you to your reader — and you want to make a good impression, always. Printing quality should stay crisp, uniform and precisely aligned without deterioration. Equally important, your typewriter should work for you when you want it to, without temperament. If service is required, simple access should make it quick and easy.

Since your typewriter is a long term investment, you will want not only the basic features, but also those that become more valuable as typing proficiency and job needs increase.

You should be at ease with your typewriter. Experienced typists recognize the distinctive feel and positive response of a "comfortable" keyboard.

Up-to-date styling is important, esthetically and practically. For as long as you own it, your typewriter should stay new looking. If you someday trade it up or pass it along, a modern look will be an asset to you.

The benefits we describe are those that have made Smith-Corona electric portable typewriters the nation's leading brand.

SCM® SMITH-CORONA
SCM CORPORATION

SMITH-CORONA®

electric typewriters with quick-change cartridge ribbon system; uses carbon film, nylon fabric and correction tape. Wide carriage and powered carriage return.

CORONAMATIC®2200

Features:

Wide Carriage: for large envelopes and oversize paper. Takes file folders, writes on letter paper the long way.

Cartridge Ribbon System

Coronamatic Cartridge Typewriters free you from the task of conventional ribbon changing. Now, you simply insert the new cartridge—and type. It takes only three seconds.

Carbon film gives a printed look, sharp and dense. Ideal for executive letters and work to be copied, printed or otherwise duplicated. Fabric ribbons are reuseable, and should be used for drafts and routine typing. Color-ribbons give your typing impact, emphasis and individuality.

Coronamatic Cartridge Typewriters are built to exacting standards of quality, to insure a long dependable service life. They have standard, office-size keyboards and a complement of features to save you time and work. Your dealer can give you a complete, detailed demonstration.

NOB

ONE-TIME FILM Carbon film for a sharp, dense image - best quality printing.

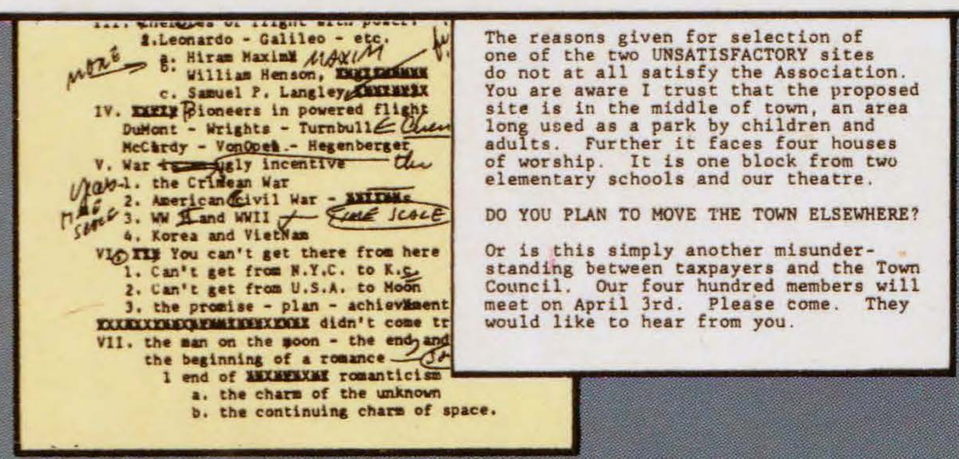
LONG-LIFE NYLON FABRIC Reusable, long-life ribbon for routine typing and drafts.

RE-RITE FILM Makes corrections easy.

SCM®

SMITH-CORONA® typewriter ribbon cartridge

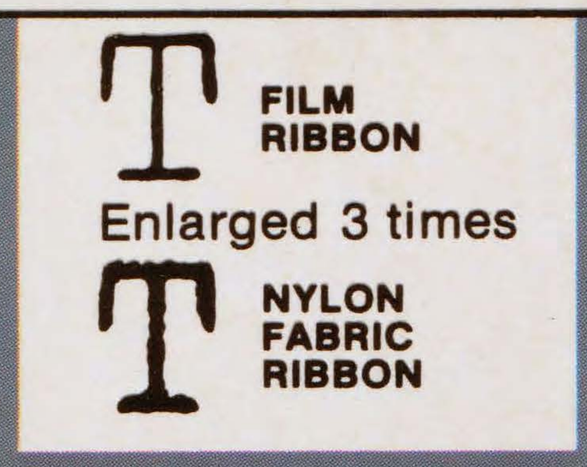
WHY A CARTRIDGE RIBBON? A fundamental advantage of your cartridge typewriter is its versatility, since you can change cartridge ribbons in seconds without mess or smudge. If you have been using only one kind of ribbon, you have a pleasant surprise in store. Ask your Smith-Corona dealer for information about the different kinds and colors of ribbons available in Coronamatic® Cartridges.



The reasons given for selection of one of the two UNSATISFACTORY sites do not at all satisfy the Association. You are aware I trust that the proposed site is in the middle of town, an area long used as a park by children and adults. Further it faces four houses of worship. It is one block from two elementary schools and our theatre.

DO YOU PLAN TO MOVE THE TOWN ELSEWHERE?

Or is this simply another misunderstanding between taxpayers and the Town Council. Our four hundred members will meet on April 3rd. Please come. They would like to hear from you.



LONG-LIFE NYLON FABRIC is reusable, therefore more economical to use. It is recommended for routine typing and drafts.

ONE-TIME FILM prints with unmatched sharpness and clarity. It is ideal for executive letters and for typing to be copied, or printed. Since it is not reusable, an extra film ribbon should be kept available.

RE-RITE offers a neat, quick way to fix errors.

COLORS can be practical, exciting or amusing, but are always attention-getting and distinctive. Red can be commanding and compelling; blue, quiet but firm. Green is freshness and vitality; brown, earthily warm and friendly. Your reasons for choosing and using colors may be different; so dare to be different.
It's easy with Coronamatic Cartridges.

DO NOT STORE IN HEAT OR DIRECT SUNLIGHT
