

Elliott-Fisher

The Bookkeeping Machine

Posts to a card ledger and makes the monthly statement and balances the account at one operation.

FOR CARD LEDGERS AND LOOSE LEAF LEDGERS

Elliott-Fisher the Bookkeeping Machine

*For Card Ledgers or
Loose Leaf Ledgers.*

No extra work at the end of the month in your Bookkeeping Department, no waiting for old fashioned trial balance figures, no delay in sending out statements, if you use Elliott-Fisher The Bookkeeping Machine.

Elliott-Fisher The Bookkeeping Machine posts to card ledgers or to loose leaf ledgers handled like card ledgers and makes out the monthly statement, if wanted—does all the adding and subtracting, computes the New Balance and prints it in the Balance column on each and every account at every entry, checks the work of the bookkeeper and proves all of its own work. Does it all mechanically and at the one operation of posting, and does it twice as fast as it can be done by hand.

Proof sheet itemizing all debits and all credits posted, showing total debits and total credits posted to all accounts, also made, at the one operation described above, when wanted, for record or checking purposes.

Any size or thickness of card or thinness of loose sheet handled easily and rapidly.

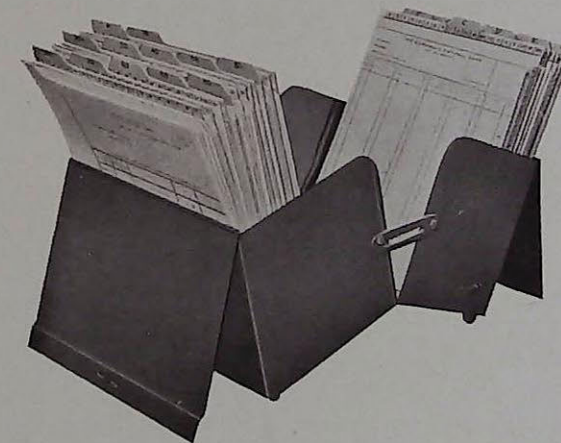

Statement in duplicate (one copy arranged for collection department use or otherwise) and the ledger at one operation, if required.

Card ledger is arranged for rapid handling in posting box as illustrated below. This posting box carries the card ledger all the time, and when not in use for posting or reference purposes, it can be easily closed, when it is compact and convenient for placing in safe or vault.

Cards may be arranged alphabetically or by account number between suitable guides and are thus self indexing.

No bending or curling of cards is necessary when being posted to on Elliott-Fisher The Bookkeeping Machine—All cards always remain flat and smooth.

Elliott-Fisher The Bookkeeping Machine posts to card ledgers two or three times as fast as they can be posted to

CARD LEDGER POSTING BOX FOR RAPID HANDLING OF
LEDGER CARDS

CAN BE CLOSED COMPACTLY FOR PLACING IN SAFE OR VAULT WHEN
NOT IN USE FOR POSTING OR REFERENCE PURPOSES

by hand. A well kept card ledger makes a beautiful record. Card ledgers are very desirable for many purposes.

When very light weight cards or loose sheets are used they may be carried in a standard loose leaf binder and are handled while being posted to as shown in the illustration

herewith. When posting is completed the binder is locked and can be used as an ordinary loose leaf book.

All accounts always in balance, statement always ready to mail, proven balance always waiting to be taken off

BINDER RACK AND STAND

FOR CARRYING A BINDER LOADED WITH LIGHT WEIGHT CARDS OR LOOSE SHEETS, WHICH CAN BE TAKEN OUT OF BINDER AND RE-INSERTED EASILY AND RAPIDLY. FOR REFERENCE PURPOSES THE BINDER IS HANDLED AS AN ORDINARY LOOSE LEAF BOOK

whenever wanted, no extra work or worry at the end of the month, no doubt, no guess work.

Elliott-Fisher The Bookkeeping Machine will put new life and spirit into your accounting department, will make

your bookkeepers more useful to you by giving them a chance to use their brains for bigger and better work than copying figures and hunting errors.

Elliott-Fisher The Bookkeeping Machine will turn the nightmare of mistake, worry and delay into daytime efficiency in your bookkeeping department and you can get

ELLIOTT-FISHER BOOKKEEPER'S CHAIR

the figures you want when you want them—promptly. The man who waits until to-morrow for yesterday's figures, carries a heavy handicap in the business race with the man who gets to-day's figures to-day.

Elliott-Fisher The Bookkeeping Machine will do better work twice as fast and much more economically in your office on your books than it is possible for you to have done any other way.

Elliott-Fisher The Bookkeeping Machine isn't made for, nor does it require any special system, but will give you the results you want, with no extra work or worry at the end of the month.

An ordinary bookkeeper with Elliott-Fisher The Bookkeeping Machine can do better work, and do it faster than the most expert accountant can do working by hand; and the ordinary bookkeeper with Elliott-Fisher The Bookkeeping Machine, will not have to hunt for mistakes because the machine completes and proves all of the work as it goes along.

This description of advantages of using Elliott-Fisher The Bookkeeping Machine refers to card ledgers and loose sheets handled like cards are handled, and may not exactly fit your requirements, but remember that no matter what method you now use, Elliott-Fisher The Bookkeeping Machine will give you the results you want, eliminate the worry of hunting for mistakes, extra work or worry at the end of the month, and you can have accurate figures about business operations, and have them promptly.

Detailed particulars of exactly what The Bookkeeping Machine can do for you are free upon request.
