

If we could call on you with a rebuilt **FAY-SHOLES** typewriter it would be an easy matter to convince you that the **FAY-SHOLES** is the lightest running machine in the world; that one of our rebuilt **FAY-SHOLES** typewriters is as good today after being rebuilt as it was the day it first left the factory; that one of these machines, though not of our latest design, is even better than a good many new typewriters of other makes; that every rebuilt **FAY-SHOLES** typewriter not only runs light and easy, but does as good work as any new machine of any make and will give good service and last long on any kind of work; that each and every rebuilt **FAY-SHOLES**, whether No. 2, No. 4 or No. 5, has advantages over every other make of typewriter, in the wonderful basket shift which helps make permanent alignment; a pointer that always points exactly—not somewhere near, but exactly—where it should point; a ribbon movement, without attachments, always ready for handling a regular or two color ribbon; the only interchangeable carriage system worth having; the—

But if we did call to see you, or sent a salesman to demonstrate the machine, somebody would have to pay for the time and the railroad fare and hotel bills, so we would have to raise the price to come out even and then you would have to pay more for the same typewriter. We sell by mail only and you save the extra salaries, commissions, railroad fares and hotel bills, and we make you more than satisfied with a No. 2 rebuilt **FAY-SHOLES** for \$35 cash or \$37.50 on time, or a No. 4 or No. 5 rebuilt **FAY-SHOLES** for \$47.50 cash or \$50 on time. If we don't satisfy you, you can have your money back.

It won't cost you anything to find out all about these splendid typewriters and how they are sold—we have other literature regarding them and plenty of stenographers to answer letters. Our stenographers all use rebuilt **FAY-SHOLES** typewriters.
