Superiority

The Remington **KMC*** + Extra Customer Benefits = More Typewriter Value for Every Dollar Invested!

The Plus Values of the Remington KMC can be measured in dollars and cents. A 15 minute saving in a typist's time every day (easily accomplished with Key Trip alone) can save almost \$50 a year. In addition, Remington KMC Typewriters boost typing output, lower typing costs.

KEYBOARD MARGIN CONTROL*—the latest Remington Rand exclusive feature—sets margins instantly, exactly—at the flick of a key. KMC gives an added value in the improved appearance of typed letters and reports.

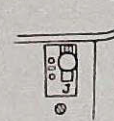

Exclusive **UNIT CONSTRUCTION** makes cleaning the Remington KMC simple and assures a longer, more useful machine life.

The exclusive **LONGER WRITING LINE** on the Remington KMC gives up to a full extra inch of typing width. It often eliminates the need, and cost, of an extra, wider carriage machine for wide reports.

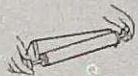

PLASTIC KEYS are finger-fitted and kind to typist's manicures; there are no rings to snag nails—or to catch and hold grime. Exclusive **KEY TRIP** instantly releases keys jammed through a mis-stroke—steps down lost time due to smudged fingers, steps up typing production. Key Trip pleases typists, too, because it helps conserve manicures.

An Exclusive **4-POSITION, 3-TRACK RIBBON CONTROL** saves money by allowing one-third more ribbon usage—cuts out for making perfect, jewel-cut stencils. **A SILENT, LIGHTER CARRIAGE RETURN** which is roller bearing mounted makes typing easier, faster, conserves the typist's energy through its smooth, effortless action.

The **REMOVABLE PLATEN** allows the typist additional freedom in cleaning her machine—also allowing her to clean the deflector plate and feed rolls. Convenient also for specialized work, including the use of interchangeable platens for card writing, stencils, etc.

Only the Remington **KMC delivers all these 'Plus Values' at no extra cost**
