INTRODUCTORY

(Written on a Multiplex - Hammond and photographically reproduced.)

The Hammond Typewriter is absolutely unique in its mechanical principles and in its accomplishments.

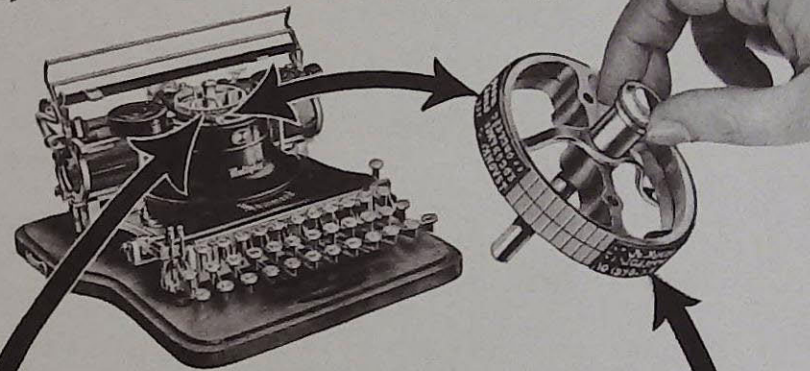

In the ordinary writing machine the printing is done by 28 to 45 different pieces of type soldered on to the ends of steel bars, and the power is furnished by the fingers of the operator.

In the Hammond, the type (90 or 120 characters as required) are cast in one piece, and the printing agency is an automatic hammer which is released by a light pressure on the keys.

THE DEPRESSION OF THE KEY BRINGS THE CHARACTER DESIRED INTO THE PROPER PRINTING POSITION, WHEREUPON THE HAMMER STRIKES INSTANTLY AND THE WRITING IS EFFECTED.

The pages which follow explain in part how the instantly interchangeable type, the perfect alignment, the uniform impression and many other exclusive features have made the Hammond famous throughout the world as the typewriter PAR EXCELLENCE.

Strong Points regarding The Improved Multiplex—The Typewriter with Interchangeable Type

FOR THE BUSINESS MAN. The Multiplex gives character and individuality to all typewritten work. Letters written in the beautiful Hammond Roman, with the emphasized portions in *striking Italic*, invariably compel attention and respect.

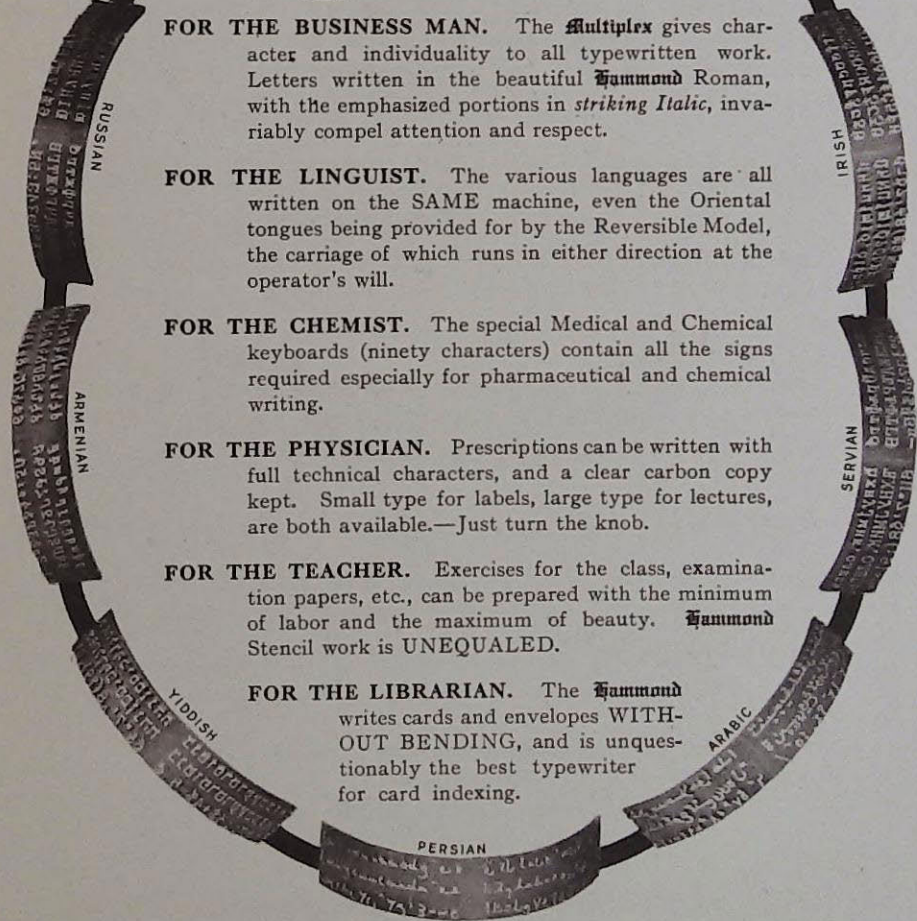

FOR THE LINGUIST. The various languages are all written on the SAME machine, even the Oriental tongues being provided for by the Reversible Model, the carriage of which runs in either direction at the operator's will.

FOR THE CHEMIST. The special Medical and Chemical keyboards (ninety characters) contain all the signs required especially for pharmaceutical and chemical writing.

FOR THE PHYSICIAN. Prescriptions can be written with full technical characters, and a clear carbon copy kept. Small type for labels, large type for lectures, are both available.—Just turn the knob.

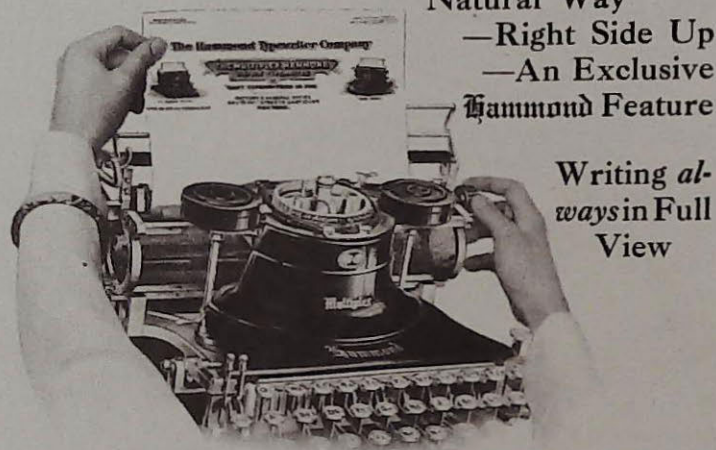

FOR THE TEACHER. Exercises for the class, examination papers, etc., can be prepared with the minimum of labor and the maximum of beauty. Hammond Stencil work is UNEQUALED.

FOR THE LIBRARIAN. The Hammond writes cards and envelopes WITHOUT BENDING, and is unquestionably the best typewriter for card indexing.

Unique and Important Features Which Distinguish

ifolding and Stencil Cutting
Speed-Anvil, carrying Two
Styles of Type and Show-
ing its Position in the
Machine

Double
Type-Carrier
or Anvil

Great Manifolding Power

is given by the New Anvil construction, insuring the required number of clear, sharp carbon copies. This is a notable advance in **Hammond** Typewriter construction on the **Improved Multiplex**.

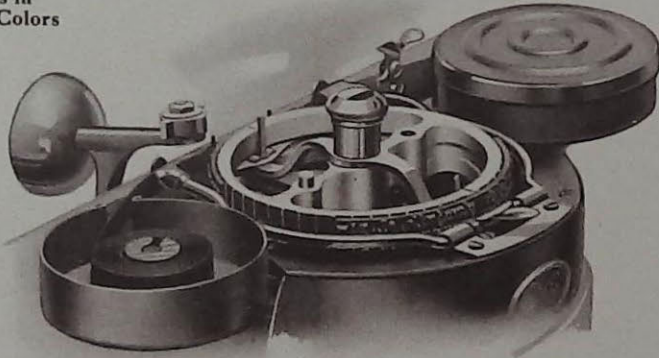

Unlimited Speed

GREATEST possible *speed* in writing is attained on the **Improved Multiplex** by the new Frictionless Speed Anvil or Type Carrier and the improved Shuttle-Arm escapement mechanism.

The *automatic* key action and escapement mechanism *respond to the lightest touch* of the operator, guaranteeing the greatest amount of work in the *quickest time—without fatigue*.

Illustrating the Perfect Movement of Ribbon Passing the Type on the **Multiplex** Ball Bearing Interchangeable-Type Typewriter

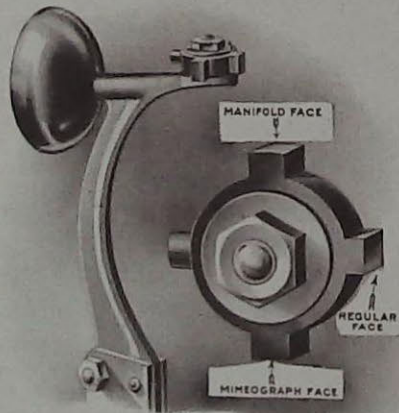

Writes in
Two Colors

The Ribbons are completely covered and protected from dust by metal cases. One of the cases has cover removed, showing Ribbon within. Protection to ribbon is found only in the IMPROVED **Multiplex**.

Besides greatly *lengthening the life* of the Ribbon, the ribbon holders insure *cleanliness* and facilitate ribbon renewal.

The Ribbon is instantly reversed by moving a lever at the left side of the machine.

The clean, even, beautiful work of the **Multiplex** Typewriter and the uniform type Impressions made by the Automatic Blow of the Hammer—are Exclusive **Multiplex** Features.

The Printing Hammer has three projecting faces as shown: For Regular work, Stencil Cutting and Manifolding.

Every impression is *automatically uniform and perfect*.

A beginner therefore produces as good work as an expert.

PRINCETON UNIVERSITY
PRINCETON, N. J.
January 1, 1916.

Mr. William S. Dwyer, Manager,
Hammond Typewriter Co., Phila.

My reply to your circular letter of November 24, 1915, in regard to inquiry the type upon which you would exchange this machine, when in a hampered way, for a new Hammond, ideal replacement. I have been most of my literary work on this machine and could not exchange it for any other one.

Very truly yours,
Richard M. Hays

OPTIC
BOTLESTOWN PA.
October 11 1915

Hammond Typewriter Company
Philadelphia

Gentlemen: For a dozen years the Hammond has been a faithful first aid for every sort of writing - efficient and dependable. In that period it has turned out work so uniformly beautiful that I have come to regard it as a salesman as well as a servant. Without it I fear that my opinion would not be in the middle. No longer could I be
Richard M. Hays
(Editor Opticist Column of "North American," Philadelphia)

Bedford, December 1st, 1916.

Mr. C. O. Gardner,
Manager New York Branch,
Hammond Typewriter Company,
New York City.

Dear Sir:

It gives me a great deal of pleasure to testify to the value and importance to me of the Hammond Typewriter. I have used your machine for more than twenty-five years, taking it with me to every part of the world, over journeys covering thousands of miles. Being so easily portable and so convenient I have been able to use it on car or steamer, in hotel or camp. Expression with it is so much swifter than with a pen that I can write a hundred thousand word story with it with the ease of fatness. For play writing I have found it ideal.

Sincerely yours,
Joseph P. Coyne
(Bertha M. Clay)

Hammond Typewriter Company,
211 Broadway,
New York, N. Y.

Dear Sirs:

We have used your machine occasionally in our office for report work for the past twenty five years and feel that they are the machine best adapted to our report work. Paper machine that we have tried.

Yours very truly,
Patterson, Tule & Dennis

The Multiplex Hammond Keyboard

With Language Plates for Writing All Languages

Multiplex Keyboard Language Plates are Instantly Removed and Interchangeable. They are Furnished to match All Regular or Special Type Plates

Greek and French-English Language Plate in Position above an English Keyboard

Combination-keyboards represent two languages—one printed in red characters, the other in black.

When using a set of type or language not corresponding to the keyboard, the Language Plate indicates the disposition or location of the characters. This simple arrangement shows how *All Languages* may be written on *One Multiplex*—without changing the Keys.

Multiplex Hammond Typewriters

Are Made in Four Widths of Carriages

All **Multiplex Hammond** Carriages take any width of paper. Forms and papers requiring lines of odd widths and great lengths may be written.

- "A" writes a line 8½ inches in length or eighty-five characters. 23 centimeters. Any width of paper.
- "B" writes a line 12 inches in length or 120 characters. 30.5 centimeters. Any width of paper.
- "C" writes a line 16 inches long or 160 characters. 40.5 centimeters. Any width of paper.
- "D" writes a line 20 inches long or 200 characters. 51 centimeters. Any width of paper.

Ideal or Scientific Keyboard of the Multiplex Interchangeable-Type Typewriter

Ideal Model

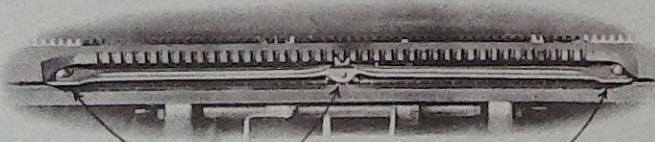

Writing Always Visible

The IDEAL or SCIENTIFIC Keyboard is preferred by many prominent business men, noted writers and authors. President Wilson, Cardinal Merry Del Val and many eminent persons use this model. It was adopted when the Hammond was first placed on the market and has always been considered the most SCIENTIFIC arrangement ever devised.

The SCIENTIFIC arrangement of keys brings the characters most used at the center of the keyboard—within easy reach of the first and second fingers of either hand.

The Ideal Model has every new Multiplex feature and improvement.

The Ball Bearings Increase Speed, Cut Operating Effort, Redouble Efficiency—on all Multiplex Hammonds
